

Oh where do I start, Robin I've been trying to find the right words to express what you have meant to our family these past 8 years but everything that comes to mind does not do justice to what you and your family have meant and have done for us, especially as first time parents all the help and the patients and especially the education you have helped us give our children. Ashley and Andrew love you very much and I don't think it has sunk in yet, because they believe you will be in our lives forever. Well I hope you will, we definitely will keep you in the loop as to their accomplishments and major events. We are thankful, blessed and very grateful for having you in our children's and our lives. We only hope for the best for you and your family. And we definitely will keep in touch.

Robin, "You will forever be in our hearts"

With great admiration

The Rojas family
